Analog Communication Objective Type Questions With Answers

An analog communication system, roughly speaking, looks like what is drawn in Figure 12.1. You can see that the information signal $x(t)$ comes in and is mapped by a modulator into a new signal $s(t)$ ready to be sent over the channel. And that is all that happens at the transmitter side—no source coder, no channel coding. At the receiver side, the signal that arrives from the channel is picked ...
