Blue areas are the native range; red areas are the introduced or invasive range. Black dots represent single sightings that did not lead to invasion, and green areas are the potential range of the species. Appledore Island. One of seven islands forming Isles of Shoals •! About 7 mi off coast of Maine.

Evolution Simulation

Darwinian Snails Lab (Tutorial): Darwinian Snails. This tutorial-style lab investigates the requirements for evolution by natural selection using an engaging simulation of crab predation on snails. Students are able to manipulate the snail population to sequentially "turn off" variation, heritability, and differential survival based on shell ...
