Cataract Some Notes After Having A Cataract Removed

A cataract is a clouding of the normally clear lens of your eye. For people who have cataracts, seeing through cloudy lenses is a bit like looking through a frosty or fogged-up window. Clouded vision caused by cataracts can make it more difficult to read, drive a car (especially at night) or see the expression on a friend's face.

Cataract: Some Notes After Having a Cataract Removed by ...

What are the symptoms of a cataract? Cataracts are a common part of the eye's aging process. Eventually, they can cause: Vision that's cloudy, blurry, foggy or filmy. Sensitivity to bright sunlight, lamps or headlights. Glare (seeing a halo around lights), especially when you drive at night with oncoming headlights.

Cataracts: What They Are, Causes, Symptoms, Surgery ...

Following extracapsular cataract extraction, the posterior capsule may become opacified. This condition, called a secondary membrane or after-cataract, occurs when subcapsular lens epithelial cells regenerate lens fibers, which obstruct vision. After-cataract is treated by yttrium-aluminum-garnet (YAG) laser treatment to the affected tissue.

Cataract Nursing Care Plan & Management - RNpedia

The good news is that approximately only 1 in 100 cataract operations need further surgery to correct any complications. In approximately 1 in 10 cases the membrane behind the new lens could become cloudy, causing blurred vision again. Laser treatment is needed afterwards to correct this. pinterest-pin-it.

What to Expect Before, During, and After Cataract Surgery ...

Normally, the lens of your eye is clear. A cataract causes the lens to become cloudy, which eventually affects your vision. Cataract surgery is performed by an eye doctor (ophthalmologist) on an outpatient basis, which means you don't have to stay in the hospital after the surgery. Cataract surgery is very common and is generally a safe procedure.
