Jonathan Herring | Oxford Law Faculty

Neoteny in humans is the slowing or delaying of body development, compared to non-human primates, resulting in features such as a large head, a flat face, and relatively short arms. These neotenic changes may have been brought about by sexual selection in human evolution. In turn, they may have permitted the development of human capacities such as emotional communication.

Neoteny - Wikipedia

Human rights in the United Kingdom concern the fundamental rights in law of every person in the United Kingdom. An integral part of the UK constitution, human rights derive from common law, from statutes such as Magna Carta, the Bill of Rights 1689 and the Human Rights Act 1998, from membership of the Council of Europe, and from international law. ...
