Cummins Isc Engine Code 559 | thelinebook.com

Fault Code 559 sets when the engine is operating and measured rail fuel pressure remains at least 250 bar [3625 psi] less than commanded pressure. Once detected, Fault Code 559 will remain active until the engine is turned OFF or until the measured rail fuel pressure matches the commanded rail fuel pressure.

Fault Code 559 (ISX)

Here's the first video <https://youtu.be/D6sMr50jVG8>

Cummins Pressure Relief Valve Diagnostic. Codes 0559, 4726

When a condition exists that causes Fault Code 559 to become active, it is typical for the fault code to become active when the engine is heavily loaded and become inactive when the engine is lightly loaded. If Fault Code 559 is inactive and there are not any existing performance complaints, it is possible the vehicle was run out of fuel or the fault became active if the engine was not primed following fuel filter replacement.

Cummins ISL ISC fuel pumps code 559/ SPN 157 - YouTube

The code could be caused by a glitch in the software. I looked up that 559 and a reflash is one of the possible solutions. I think they start with a pressure test of the pump. It can be a bad connection to the ECM, a bad sensor, bad relay, voltage problem and some other stuff.

559 Trouble Code - IRV2 Forums

559 is call "killer code" Your fuel pump is bad, hope only plungers are bad, but usually are tappets are bad, and pieces of them going straight to oil. And after You have to clean all oil components, oil cooler, gearhousing..... So You have to inspect your hi pressure fuel pump, pull out head and check. good luck.
