Implicit and Explicit Attitudes Toward Autistic Adults ...

To address some of these concerns 'implicit' measures of self-esteem are currently being explored (Greenwald and Banaji 1995). Most of these measures work by priming the self, i.e., making the self salient, and then measuring the impact of self-salience on other evaluative responses. For example, when the self is primed, the more positive the self-evaluation the faster one should be in making other positive evaluative judgments.

Implicit Measure - an overview | ScienceDirect Topics

The use of implicit measures in social and personality psychology has its roots in the mid-1980s when researchers adopted sequential priming tasks from cognitive psychology to study the automatic activation of attitudes (Fazio, Sanbonmatsu, Powell, & Kardes, 1986) and stereotypes (Gaertner & McLaughlin, 1983).
