Countries with the most mammal species

Humans are likely the most numerous species of mammal on Earth at the moment. Having reached some 7 billion in 2011, we outnumber our fellow furries by a wide margin. The only species that may come close to (or exceed) us in numbers are the brown rat (*Rattus norvegicus*) and house mouse (*Mus domesticus*), whose evolutionary histories and distribution are closely tied to our own.

The Most Numerous Organisms in the World | Britannica

The hedgehog is a type of mammal that can be found in parts of Europe, Africa, and Asia and though it doesn't feature prominently in world mythology and folklore, certain cultures have incorporated it into their traditions. This animal has both positive and negative associations. In ancient Egyptian society, the hedgehog had a favorable
