Predator/Prey Populations Worksheet: Hare and Lynx ...

3. Most biology textbooks describe that predators and prey exist in a balance. This "balance of nature" hypothesis has been criticized by some scientists because it suggests a relationship between predators and prey that is good and necessary. Opponents of this hypothesis propose the following questions:

Predator prey - changing populations | Teaching Resources

The wildlife service decided to bring in natural predators to control the deer population. It was hoped that natural predation would keep the deer population from becoming too large and also increase the deer quality. Table shows changes in deer and wolf populations over time, students graph data and draw conclusions about the success of the program.

Deer: Predation or Starvation - The Biology Corner

For example, if it is advantageous for the prey to be fast, then the predator must be faster; if the prey can hide, the predator needs better eyes, etc. 3. Next, introduce the concept of coevolution. 4. Explain to students that coevolution has been studied in predator-prey relationships. Explain that as predators evolved, the prey had to adapt
