When I look at my base table in SSMS in design mode, for the Shape column it is showing int rather than geometry or geography. I believe that this is referring to binary. As a test, I copied the same feature class into a new test db and it came in as geometry and the select statement works after changing the shape.len to shape.STLength().

History of geometry - Wikipedia

a change in the position, size, or shape of a geometric figure.

Geomerty Ch. 9 Vocab Flashcards | Quizlet

When you reflect a shape in coordinate geometry, the reflected shape remains congruent to the original, but something

Online Library The Changing Shape Of Geometry By Chris Pritchard

changes. That something is the new shape's orientation. For example, as you can see in the image, the triangle in the mirror is flipped over compared with the real triangle. A triangle's reflection in a mirror.
